Proposal

Introduction to the organization

Organization that the website will be based on is NBA (National Basketball Organization) league. This organization is about a team sport known as Basketball. NBA is an American basketball league in which many teams compete with a certain way of path to NBA championship. There are thirty teams that compete in this league becoming and conquering NBA title. All this information can be displayed or given through a website.

Statement of problem or need

Every team has been competing since many years and some have won the championship and some has not even got close to the finals. All the teams that compete in NBA have some stats and many NBA fans all over the world follow their team and want to see their team's stats, not only the team fans also people like me who are researching about NBA for some purposes need information about the NBA and the team stats. All the team has their own home ground and is based upon a particular city from USA and Canada.

Objectives

The main Objective of this project is to create a website and show our ideas and creativity which displays a website with proper layout design and management of contents in the website. This website is created to show some information on NBA league and team stats and also a webpage where you can fill out a form for signing up for membership and contacting the website creator. Web Development will help us in future but creating a website means creating a means of giving out information to people who are in search of the related topic in this 21st century, though website is used for other purposes too but mine is about giving information on a certain topic.

Time factor and management

This Coursework is given in Week 24 and the deadline is on May 12, 2017. Everything I do must be with proper time management which will help me finish my coursework before the deadline and will have plenty of time to recheck and modify at last before submission. So, all the research

and ideas was started as soon as this assignment was handed out. After the research and creating a certain goals and objective then comes the coding part. Coding will be done in three different part, first all the HTML works will be done then comes the styling part in which CSS codes will be written and at last JavaScript will be installed on the codes for picture slides and form validation. With proper time management, I will be able to finish this coursework before a week of the deadline and will have plenty of time to finalize my work at last week till the deadline.

Introduction:

Developing a website or web development is very helpful and interesting part of our course. Learning this will make us go through the idea of HTML, CSS and JavaScript programming language and in near future we can develop an official website using these programming languages and even find a career path in web development. HTML or Hyper Text Markup Language which was created by Tim Berners-Lee in 1990. HTML is used to create a webpage on a website and is also used to link to other pages which is also known as hyperlink (Computer Hope, 2017). This gives the webpage all the content and its structure by defining them (Howe, 2014). After HTML, CSS was the next language that was needed, Cascading Style Sheet(CSS) is a language that is used for creating layouts and design of a webpage which gives a website a greater look than just normal text display by HTML codes (Mozilla Developer Network and individual contributors, 2016). JavaScript was needed too, this programming language is a scripting language which adds validation of forms in the webpage, the sliders, this is basically a language which supports object oriented style of programming language (Mozilla Developer Network and individual contributors, 2017).

Developing a website on a certain topic or organization of our own choice was good news to hear and I choose National Basketball Association League(NBA) which would just give a partial information for the clients or users that are interested on learning “what is NBA?”. This Website is gives out information of an organization called National Basketball Association(NBA). NBA is an American basketball league which happens every year, this is also the highest competitive league for basketball all around the world. NBA league is played by thirty teams from which 29 are from different states in United States of America and 1 is from Toronto, Canada. My website only gives out basic information on NBA league, such as history of NBA, how is teams of this league divided and their stats of NBA Championship till now. There is even a webpage where you can contact the page owner and sign up for membership of this website.

The main goal of this assessment is to create a website on an organization, in my case NBA league. This website that is being created is just a simple website with five webpages which are linked back and forth to each other and two sub webpages on one of the five webpages. Every website needs to have a proper header consisting a navigation bar and footer section in each webpage of

the website and show my creativity and ideas of creating layout of the webpages. These are the basic goals of this web development.

Discussion and Analysis:

This project was about creating a website about NBA league. My website needed to give out proper information on this topic and with proper management of all the contents in different webpage. HTML5, CSS3 and JavaScript were to use while making this website. All codes of these three we done on Notepad++ which looks like as shown in the below figure.

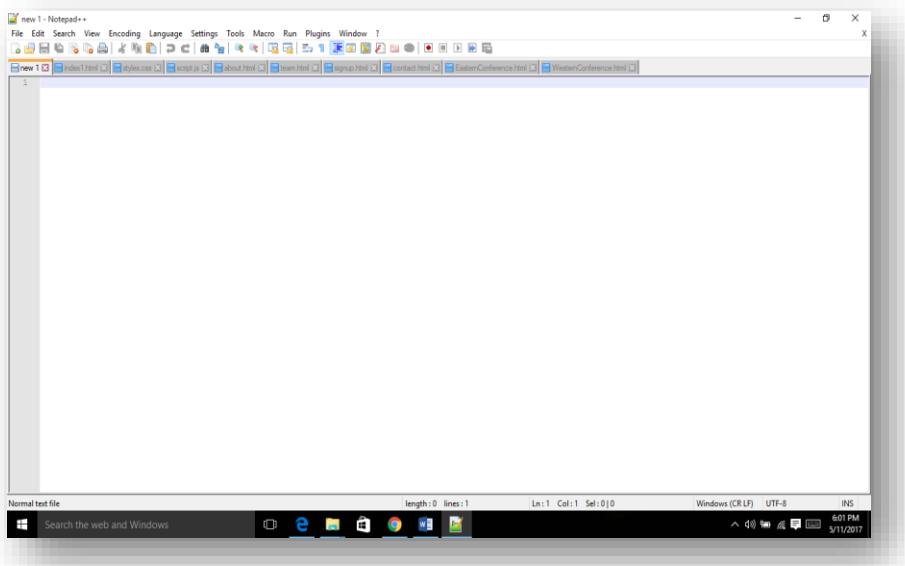

Figure 1 Source Code Editor Notepad++

Notepad++ is same as Notepad that is present in most of our laptops and PC, this is also a source code editor in which we can use different programming languages such as Java, JavaScript, CSS and HTML. Using this editor was due to its capability of executing in higher speed than notepad and the size of the program was comparatively smaller, this is due to use of Win32 API and STL by notepad++. This editor composed by C++, another programming language. (Don Ho, 2016)

While doing the documentation, making wireframe of the webpages was a requirement of the assessment handed out to us. To create a wireframe, I used Visio 2013 which is shown in the below figure.

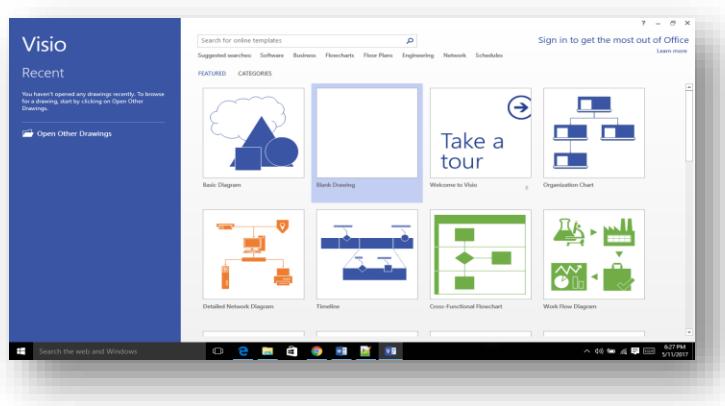

Figure 2 Microsoft Visio

Wireframe:

A diagram showing the layout of the webpage which explains all the elements that exists on the page and is a part of interaction design is known as wireframe. As the definition states the key role of wire frame in this documentation is providing the client or the users the visual explanation which will give them to see and approve whether they like it or not before creating the final website by the programmer. (Experience UX, 2016)

Wireframe Page 1: Home Page

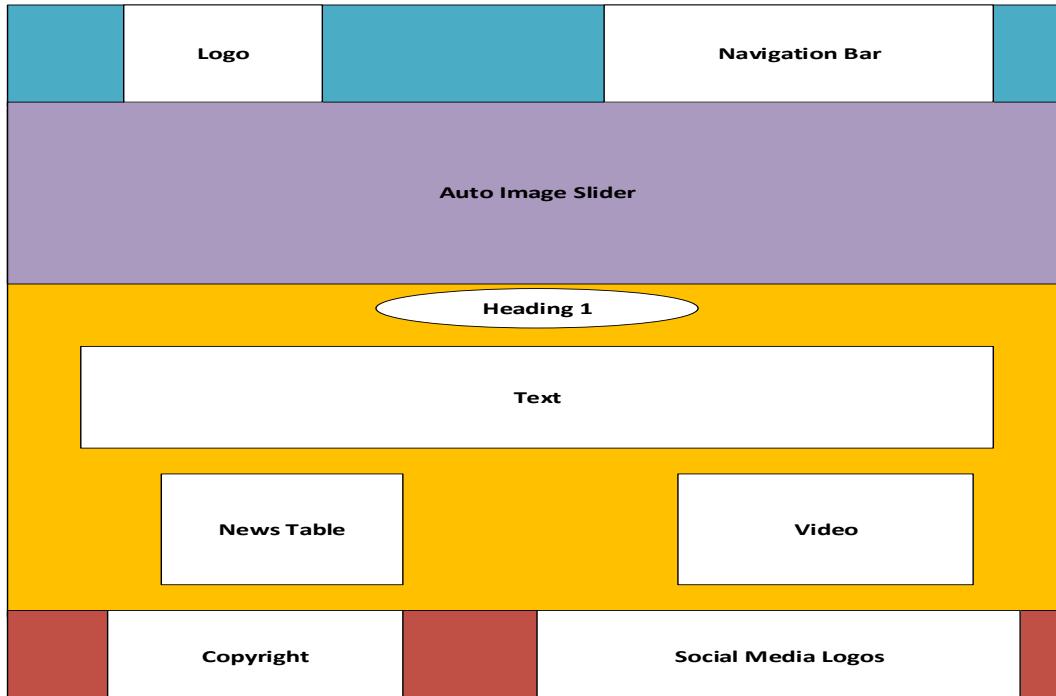

Figure 3 Wireframe of Home Page

The above figure is the wireframe of index1.html which is the main and first page of the website. The header consists of logo on the left and navigation bar on right which has hyperlink to other pages of the website. Just below it there is an auto image slider which changes images in every 2 seconds. After this, there is a heading at center and just below it there is some text part. In the same section, after text there is a news table at the left side and a video on the right side of the page. Footer consists of copyright text on the left side and social media icons on the right.

Wireframe Page 2: About Us Page

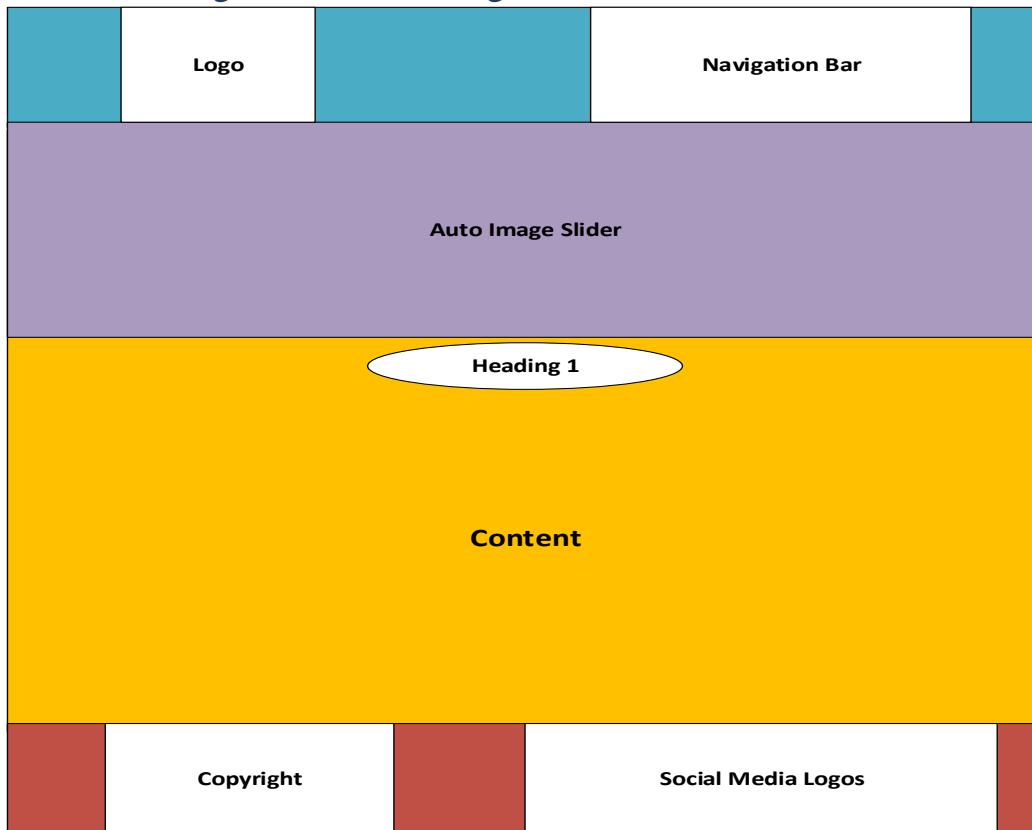

Figure 4 Wireframe of About Us Page

The above wireframe is of about.html which is a new webpage linked to the home page and other pages. The header, image slider and footer is as same as the home page. The content of this page after image slider has a heading and a brief text after the heading.

Wireframe Page 3: Team and Stats Page

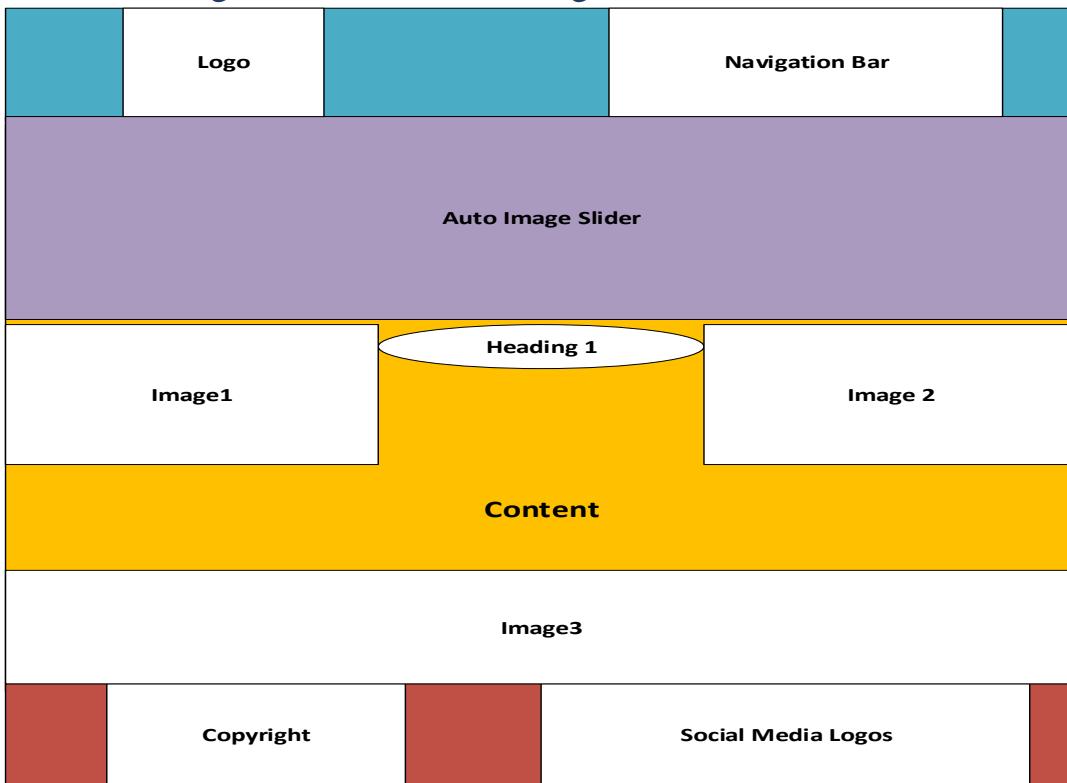

Figure 5 Wireframe of Team And Stats Page

The above wireframe is of team.html which is a new webpage linked to other webpages on the website. The header, image slider and footer is as same as others. The content of this page after image slider has a heading and an image on the right side and the left side of the heading. The images of the right and left is linked to two different webpages respectively. The content text starts from the gap between two images and as soon as the text part finishes there is another image below.

Wireframe Page 4: Eastern Conference Page

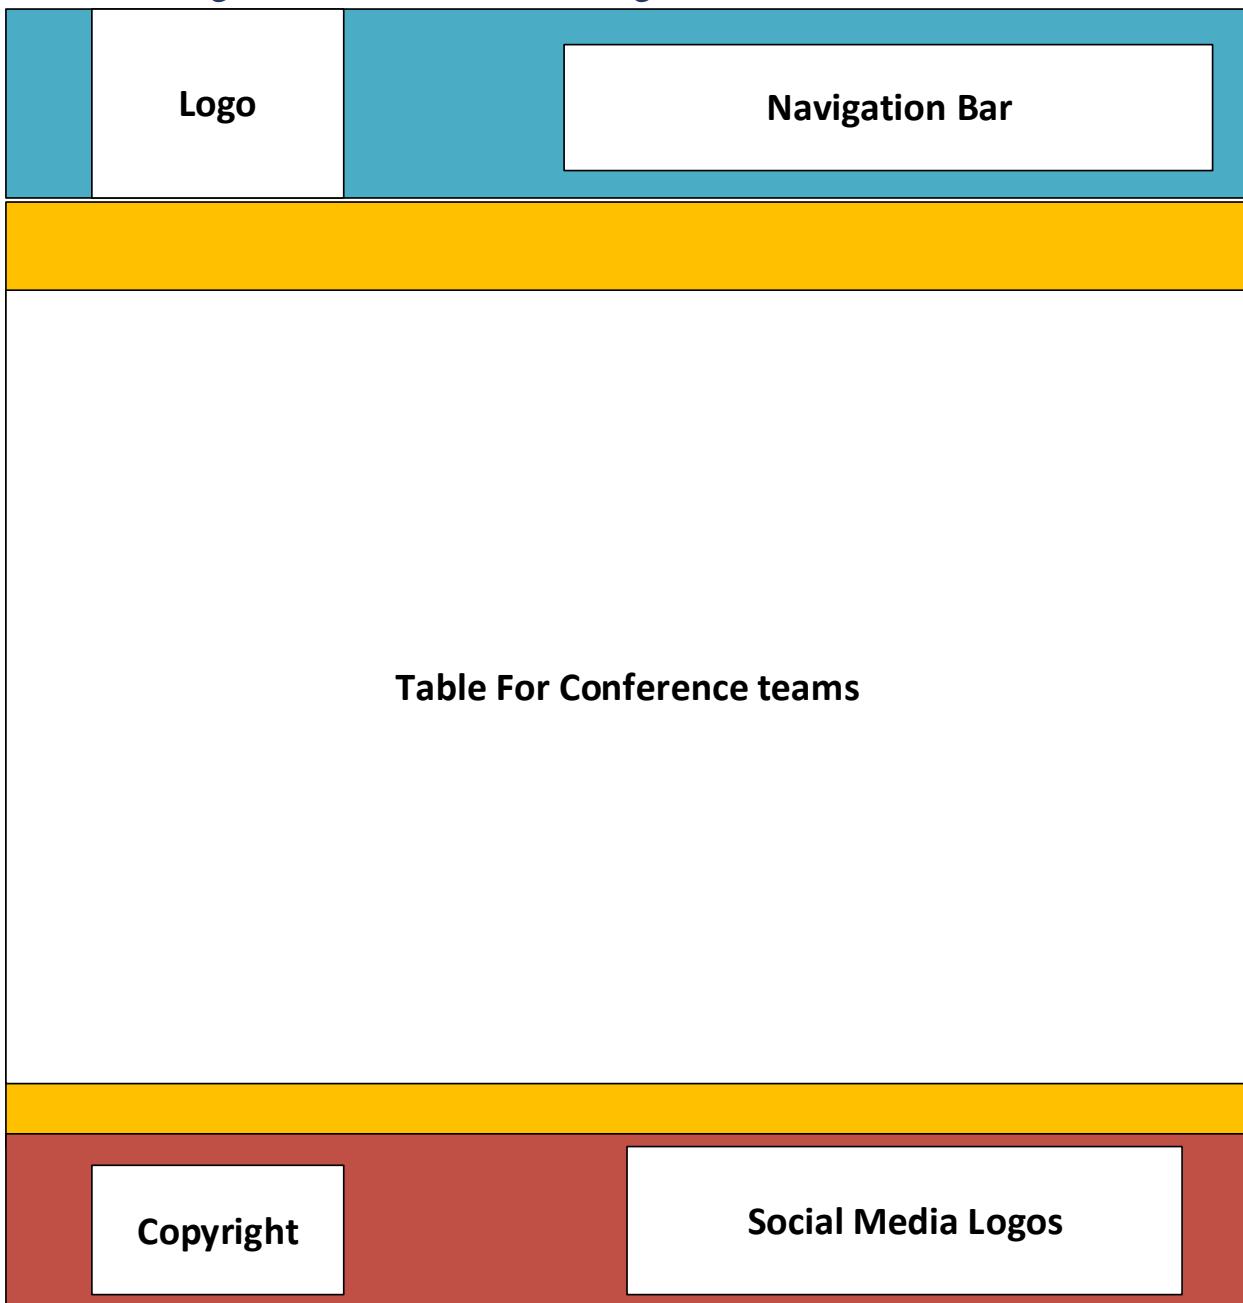

Figure 6 Wireframe of Eastern Conference Page

The above wireframe is of EasternConference.html which is a new webpage linked by one of the image on team.html page and is also linked to other webpages on the website. The header and footer is as same as others. Instead of image slider after the header part this page consists of carousel. The content of this page after carousel has a table of certain teams and their stats.

Wireframe Page 5: Western Conference Page

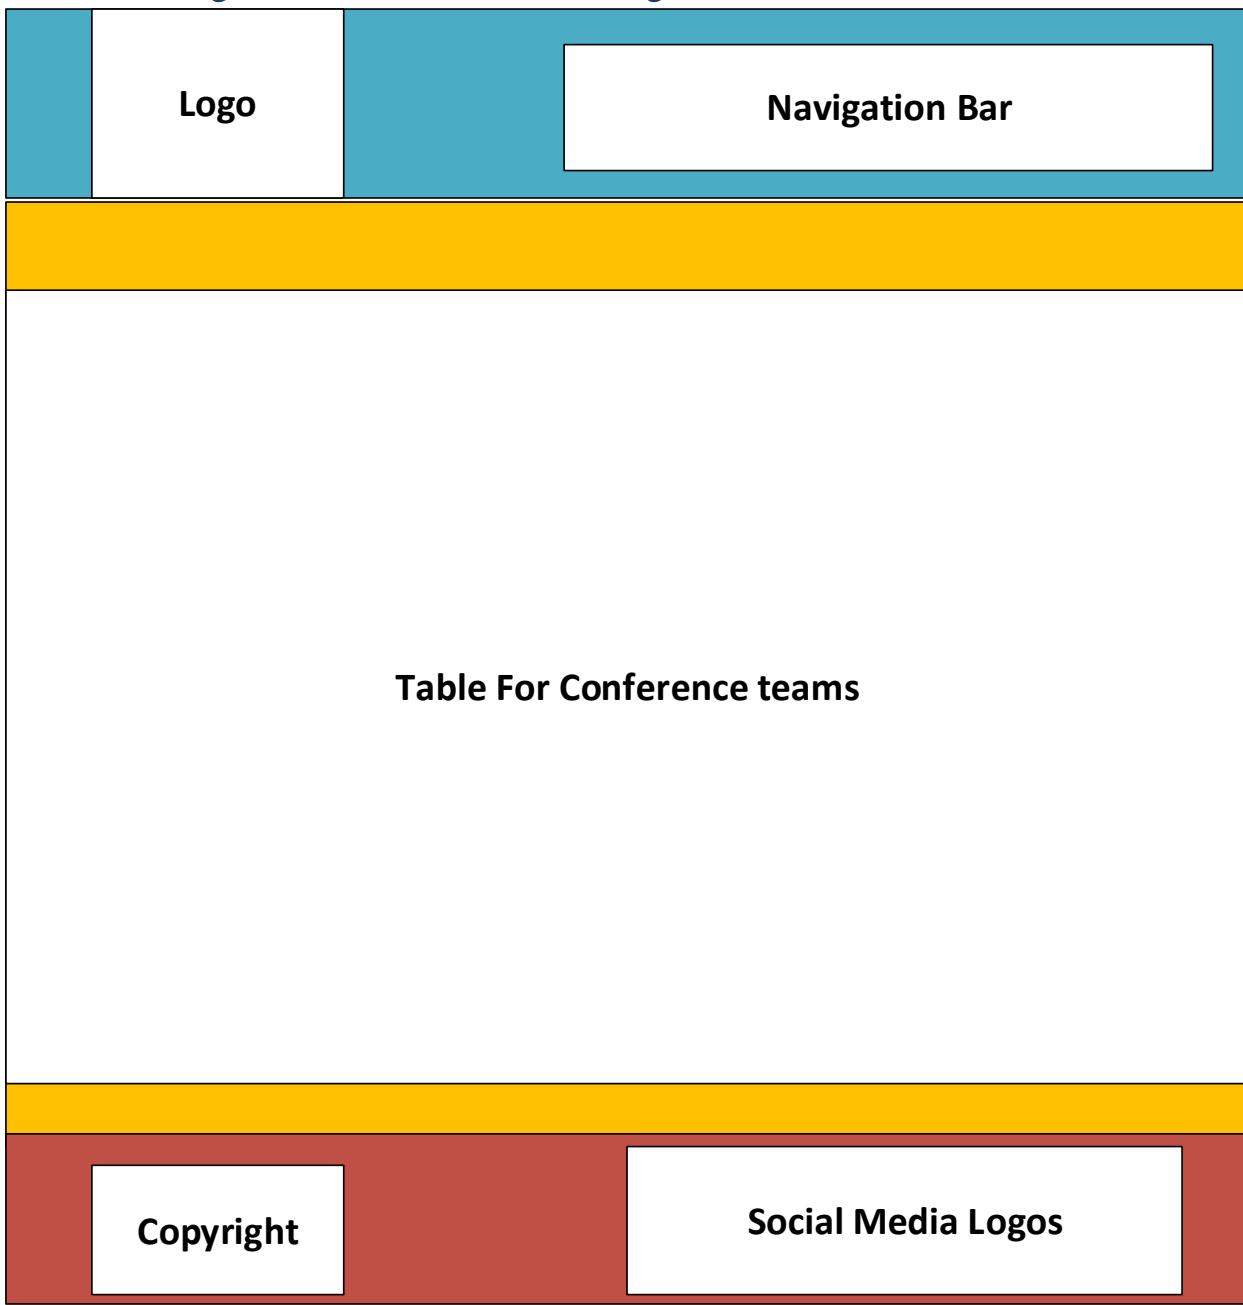

Figure 7 Wireframe of Western Conference Page

The above wireframe is of WesternConference.html which is a new webpage linked by one of the image on team.html page and is also linked to other webpages on the website. The header and footer is as same as other webpages. Instead of image slider after the header part this page consists of carousel. The content of this page after carousel has a table of certain teams and their stats.

Wireframe Page 6: Sign Up Page

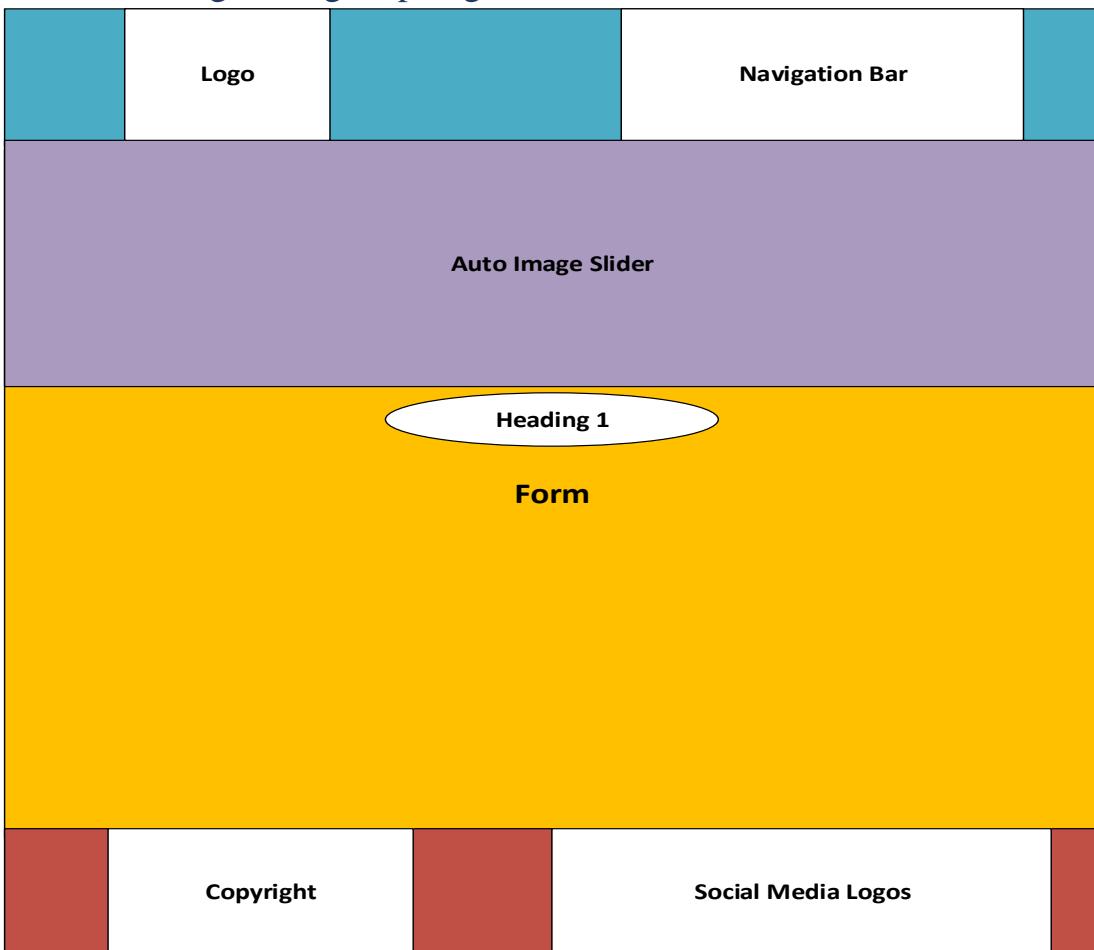

Figure 8 Wireframe of Sign Up Page

The above wireframe is of signup.html which is a new webpage linked to the home page and other pages. The header, image slider and footer is as same as home page. The content of this page after image slider has a heading and a form to fill out with buttons at last.

Wireframe Page 7: Contact Us Page

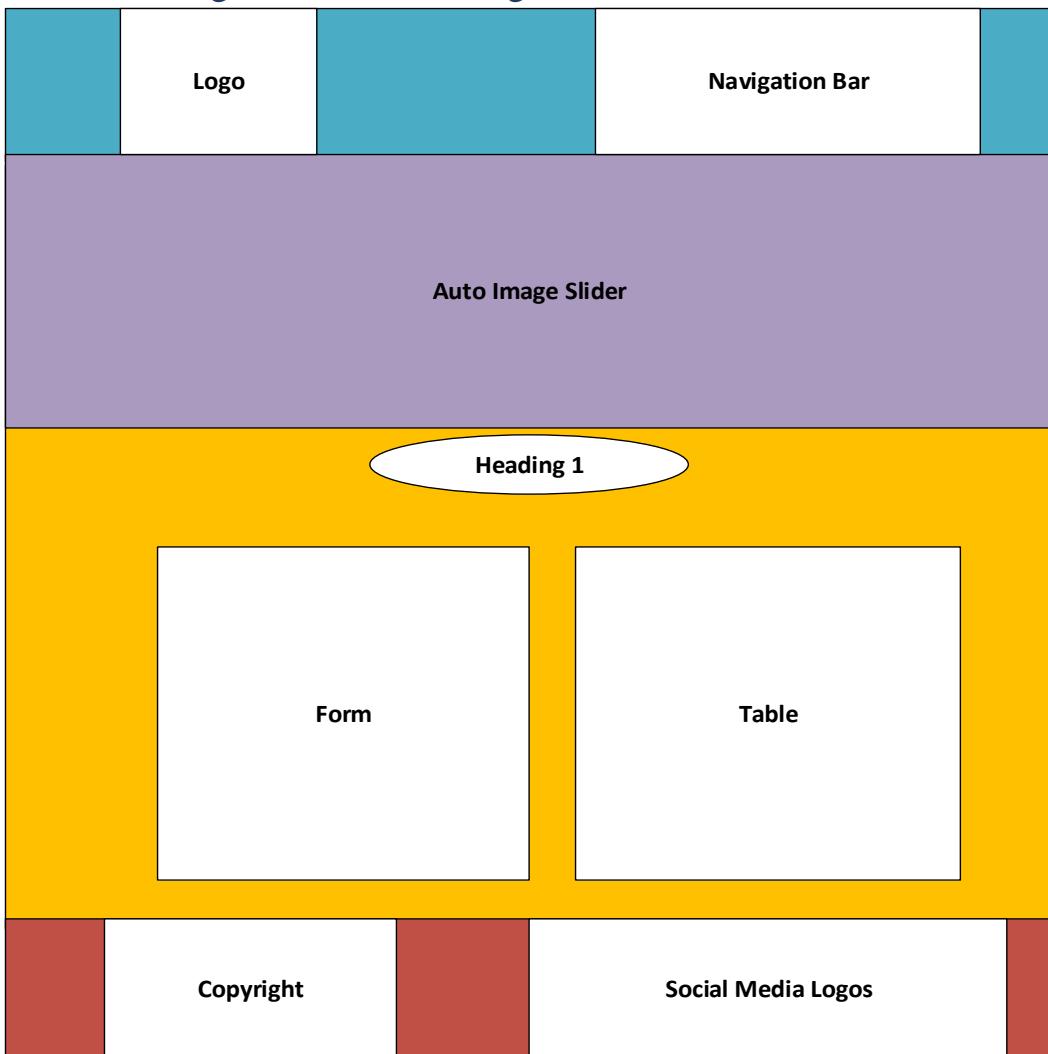

Figure 9 Wireframe of Contact Us Page

The above wireframe is of contact.html which is a new webpage linked to the home page and other pages. The header, image slider and footer is as same as home page. The content of this page after image slider which has a heading and a form on the left side to fill out with buttons at last. On the right side after heading there is a table consisting of information to where to contact.

Webpage 6: Sign Up Page

The screenshot shows a webpage titled "Sign Up" with the URL "file:///C:/Users/Shah/Desktop/webpage/signup.html". The page features the NBA logo at the top left and a navigation bar with links to Home, About Us, Team And Stats, Sign Up, and Contact Us. The main content area has a background collage of NBA players in various uniforms. Overlaid on the collage is a "Registration Form" with fields for Name, Address, and Phone No., each accompanied by a placeholder text input field. At the bottom of the page is a copyright notice and a row of social media icons.

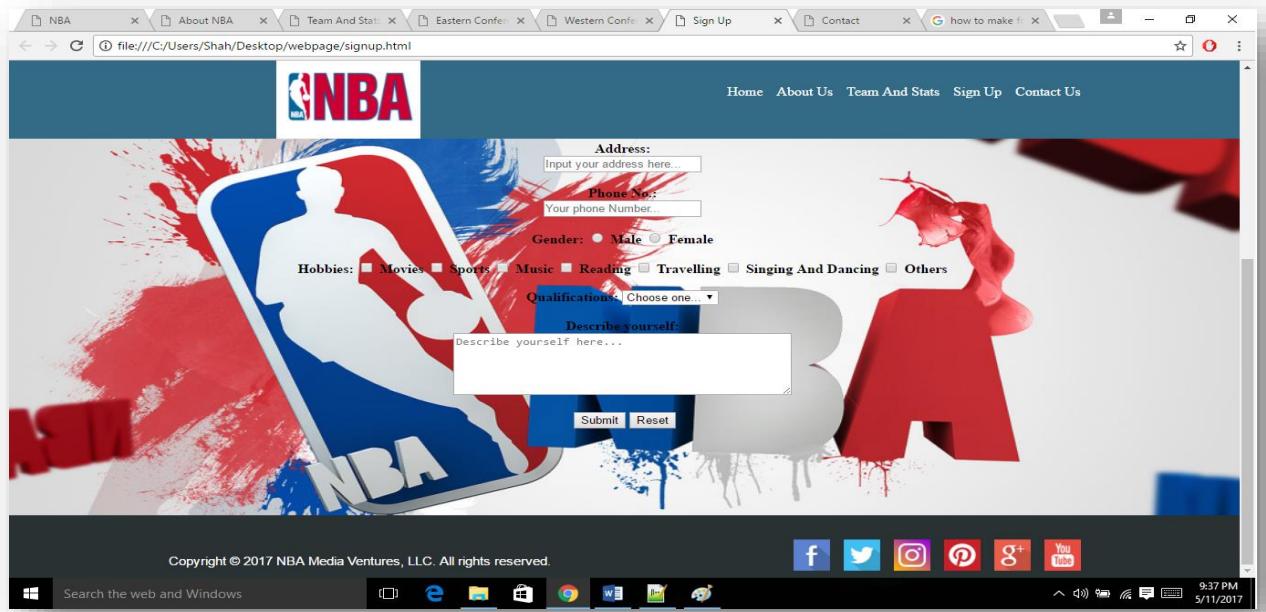

Figure 26 Final Outcome: Contact Us Page 1

Research:

Learning is increased just when we read or learn about something some place. Indeed, even to make a thought there must be a piece of information that drove us to that thought of our own. A considerable measure of research and discoveries were important while doing this assessment and I picked up a great deal of learning that I needed to finish my documentation and this assignment and I even increased some additional information that was a bit much for this assessment.

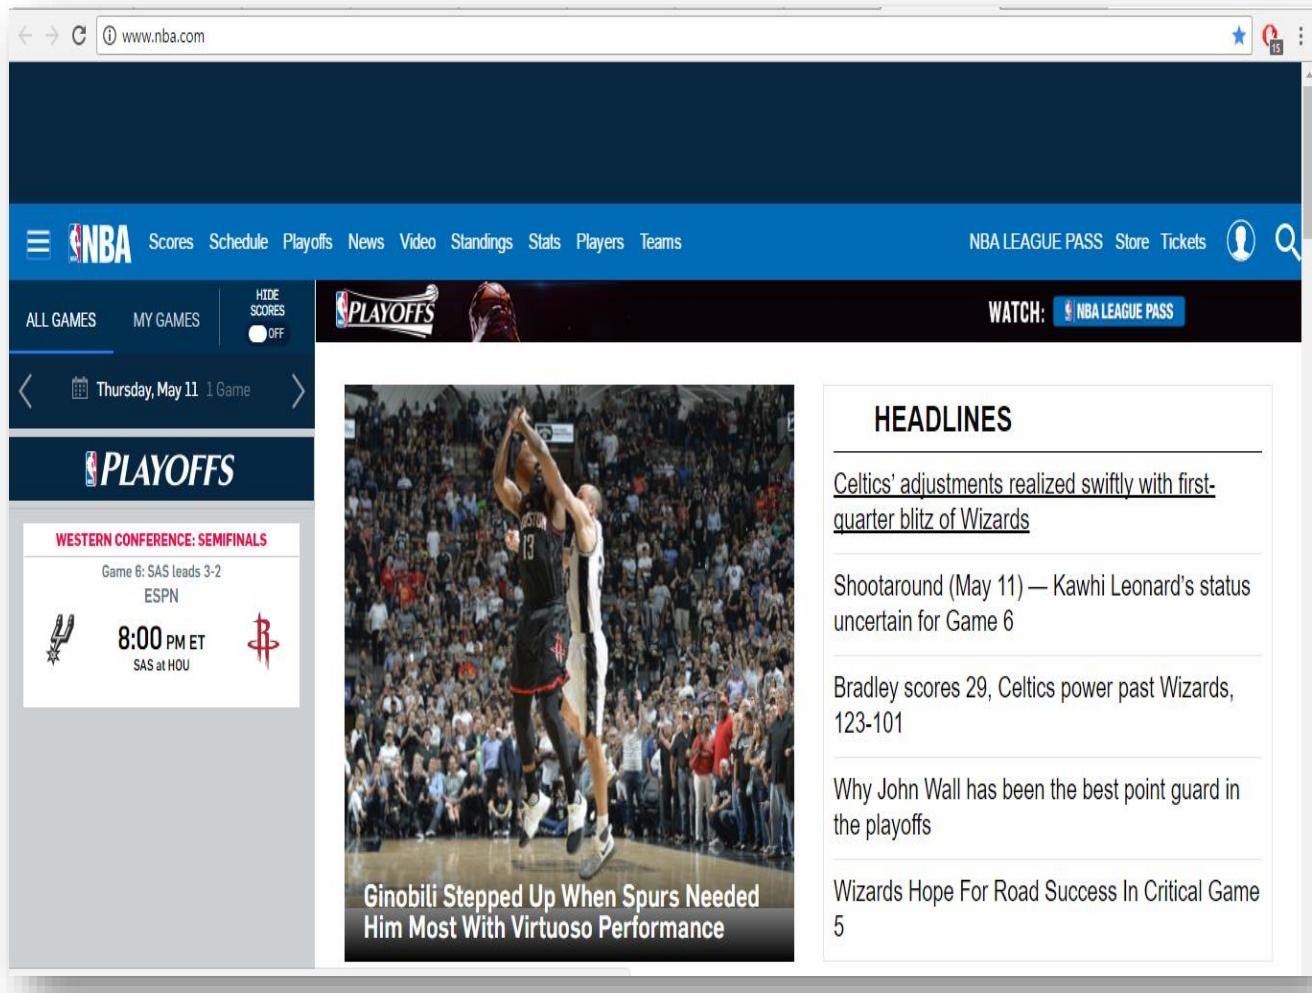

Figure 27 Research: Official NBA Home Page

The above figure shows the official website of NBA. This website has a blank header at top first then a navigation bar which consists of menus, logo and a search icon. My website has a header I which there is a logo on left side and navigation bar on the right but do not have the search icon

like this website. My header has a fixed position so header does not disappear when scrolling down or up.

The screenshot shows the NBA sign-up page with a blue header containing the NBA logo and a 'Help' link. Below the header, a navigation bar indicates the user is at 'Step 1: Your NBA Account'. The main form is titled 'Create an NBA Account' and includes fields for 'Email Address' (with placeholder 'I'), 'Password' (placeholder '6-20 characters'), 'Show Password' (checkbox), 'Date of Birth' (MM DD YYYY), 'Country' (dropdown menu), and 'Postal Code' (text input). There is also a link 'Already have an account? Sign In'.

Figure 28 Research: Official NBA Sign Up Page

The above webpage is a sign-up page of official NBA website which has divided the form in three steps unlike mine. And this webpage also has different field than mine. As per the difference is that my form has field where the user can select their hobbies and also a text field where the user can describe themselves.

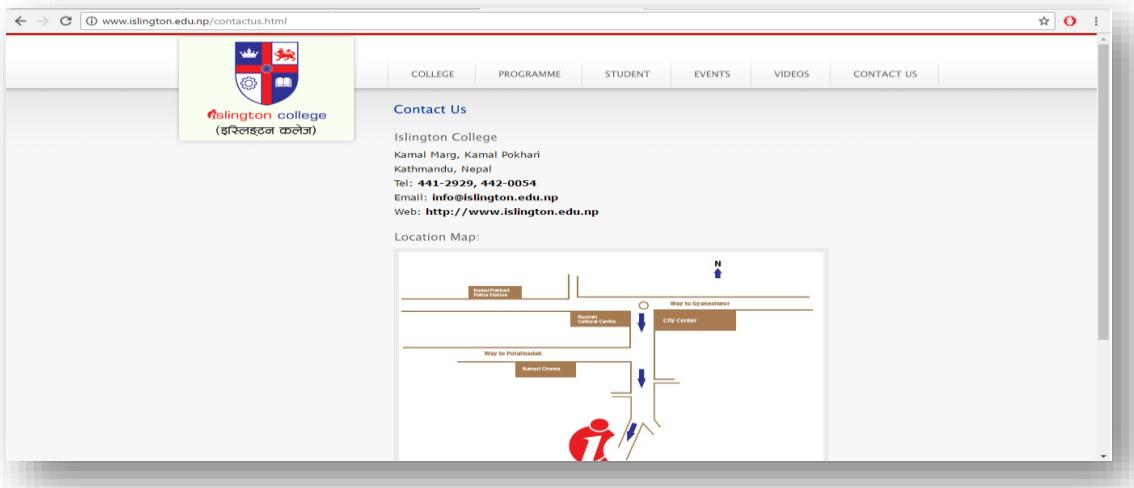

Figure 29 Research: Islington College's Contact Us Page

The above website is of Islington college which shows the contact page of it. This contact webpage has a map of location where they are available but in my contact page, there is just contact info and a form where user can leave a message to the owner of the site which is not available on this contact page of Islington College.

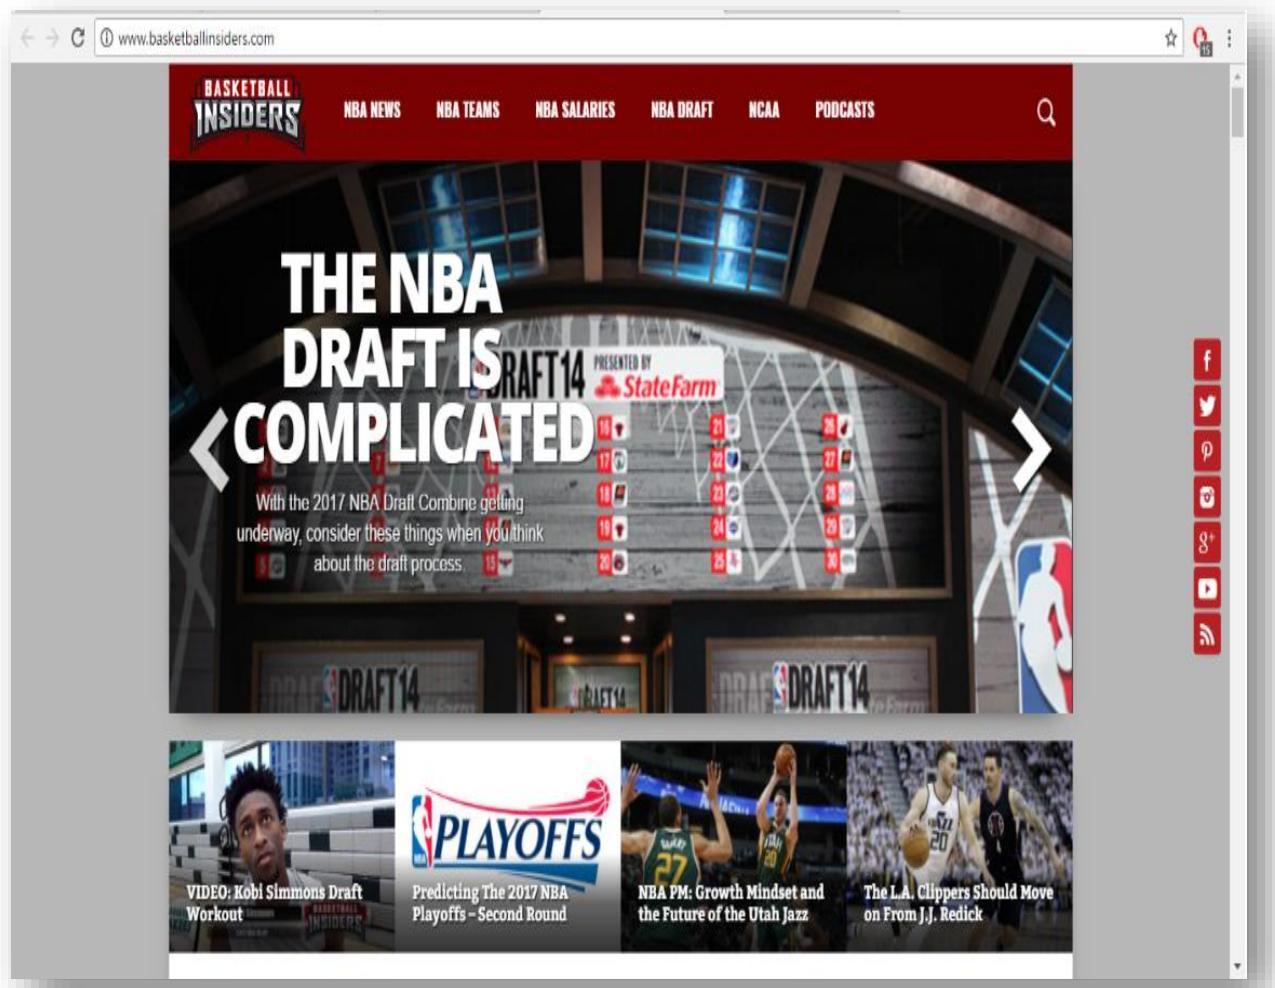

Figure 30 Research: Home Page of Basketball Insiders

The auto slide I have kept on the five webpages of mine is a n idea from the above figure's website. This website has same style of image slider which slides automatically like mine, but this slider has captions written and there is a previous and next arrow which is not available on the slider I have kept on my webpage. When scrolled down the slider disappears with the header

too but in my website just the slider disappears and the header will still be on top.

Figure 31 Research: Home Page of Inside Hoops

The website shown in the above figure shows the social icons on the right side of the webpage and this webpage has no footer. Basically, the footer content of my webpage is displayed on right side on this above webpage. Whereas I have footer at bottom of my webpage which is fixed and all the contents of it are displayed horizontally unlike this webpage. My footer has a fixed position so footer does not disappear when scrolling down or up.

Conclusion:

Assignment is not just about taking in the theme identified with it, while doing this assignment I got a chance to find out about administration of time and division of errand according to the due date of assignment, and confronting the obstructions head on intuition consistently. The points and topics that is identified with this assignment was instructed by my instructor in the class so it was not something new that I was doing it by my own particular research and discoveries. Lectures, tutorial and lab classes that was held identified with this topic helped a ton for intuition and making the creative idea and way to complete this course work easier.

While creating this website, I learned a lot about the three programming languages that I used to create the website which are HTML, CSS and JavaScript. The uses of these three languages and drawbacks of these three languages and how these helps to create a website with a proper management and ease is what I learned while doing my coursework. I learned about wireframes, and style of using JavaScript and CSS in three ways which are internal, inline and external. I also learned how to connect a CSS file with html and JavaScript file with the same html so that the webpage would run the codes of both CSS and JavaScript file that was written separately. As it was the first time that I was learning to make a website using those three languages I had difficulties at first then slowly with plenty of research and with slides and topics taught by my module leader I adapted to style of coding and there were less errors and problems later on.

In this manner, it was an incredible chance to work alone and investigate my shortcoming and quality while doing a coursework or a project and finishing it on time and also got a lot of experience on how to tackle problems and how to hit switch off to panic button when there was a big error or something was not working.

<h1>Introduction to NBA</h1>
<div class="contentText">
<div id="text"><p><b>The National Basketball Association (NBA)</b> is the major men's professional basketball league in North America, and is widely considered to be the premier men's professional basketball league in the world. It has 30 teams (29 in the United States and 1 in Canada), and is an active member of USA Basketball (USB), which is recognized by FIBA (also known as the International Basketball Federation) as the national governing body for basketball in the United States. The NBA is one of the four major professional sports leagues in the United States and Canada. NBA players are the world's best paid athletes by average annual salary per player. The league was founded in New York City on June 6, 1946, as the Basketball Association of America (BAA). The league adopted the name National Basketball Association on August 3, 1949, after merging with its rival National Basketball League (NBL). The league's several international as well as individual team offices are directed out of its head offices located in the Olympic Tower at 645 Fifth Avenue in New York City. NBA Entertainment and NBA TV studios are directed out of offices located in Secaucus, New Jersey.<br> The Basketball Association of America was founded in 1946 by owners of the major ice hockey arenas in the Northeastern and Midwestern United States and Canada. On November 1, 1946, in Toronto, Canada, the Toronto Huskies hosted the New York Knickerbockers at Maple Leaf Gardens, in a game the NBA now regards as the first played in its history. The first basket was made by Ossie Schectman of the Knickerbockers. Although there had been earlier attempts at professional basketball leagues, including the American Basketball League and the NBL, the BAA was the first league to attempt to play primarily in large arenas in major cities. During its early years, the quality of play in the BAA was not significantly better than in competing leagues or among leading independent clubs such as the Harlem Globetrotters. For instance, the 1948 ABL finalist Baltimore Bullets moved to the BAA and won that league's 1948 title, and the 1948 NBL champion Minneapolis Lakers won the 1949 BAA title. Prior to the 1948-49 season, however, NBL teams from Fort Wayne, Indianapolis, Minneapolis, and Rochester jumped to the BAA, which established the BAA as the league of choice for collegians looking to turn professional. Following the 1948-49 season, the BAA took in the remainder of the NBL: Syracuse, Anderson, Tri-Cities, Sheboygan, Denver, and Waterloo. In deference to the merger and to avoid possible legal complications, the league name was changed from the BAA to the National Basketball Association in spite of having the same BAA governing body including Podoloff. The new league had seventeen franchises located in a mix of large and small cities, as well as large arenas and smaller gymnasiums and armories. In 1950, the NBA consolidated to eleven franchises, a process that continued until 1953-54, when the league reached its smallest size of eight franchises: the New York Knicks, Boston Celtics, Philadelphia Warriors, Minneapolis Lakers, Rochester Royals, Fort Wayne Pistons, Tri-Cities Blackhawks, and Syracuse Nationals, all of which remain in the league today. The process of contraction saw the league's smaller-city franchises move to larger cities. The Hawks shifted from the Tri-Cities to Milwaukee in 1951, and then to St. Louis in 1955. The Rochester Royals moved from Rochester, New York, to Cincinnati in 1957 and the Pistons relocated from Fort Wayne, Indiana, to Detroit in 1957. Japanese-American Wataru Misaka broke the NBA color barrier in the 1947-48 season when he played for the New York Knicks. He remained the only non-white player in league history prior to the first African-American, Harold Hunter, signing with the Washington Capitols in 1950. Hunter was cut from the team during training camp, but several African-American players did play in the league later that year, including Chuck Cooper with the Celtics, Nathaniel "Sweetwater" Clifton with the Knicks, and Earl Lloyd with the Washington Capitols. During this period, the Minneapolis Lakers, led by center George Mikan, won five NBA Championships and established themselves as the league's first dynasty. To encourage shooting and discourage stalling, the league introduced the 24-second shot clock in 1954. If a team does not attempt to score a field goal (or the ball fails to make contact with the rim) within 24 seconds of obtaining the ball, play is stopped and the ball given to its opponent.<br> The NBA originated in 1946 with 11 teams, and through a sequence of team expansions, reductions, and relocations, currently consists of 30 teams</p>

60 Japanese-American Wataru Misaka broke the NBA color barrier in the 1947-48 season when he played for the New York Knicks.
61 He remained the only non-white player in league history prior to the first African-American, Harold Hunter, signing with the Washington
62 Capitols in 1950. Hunter was cut from the team during training camp, but several African-American players did play in the
63 league later that year, including Chuck Cooper with the Celtics, Nathaniel "Sweetwater" Clifton with the Knicks, and Earl Lloyd with the
64 Washington Capitols. During this period, the Minneapolis Lakers, led by center George Mikan, won five NBA Championships and established
65 themselves as the league's first dynasty. To encourage shooting and discourage stalling, the league introduced the 24-second shot clock
66 in 1954. If a team does not attempt to score a field goal (or the ball fails to make contact with the rim) within 24 seconds of obtaining
67 the ball, play is stopped and the ball given to its opponent.<br>
68 The NBA originated in 1946 with 11 teams, and through a sequence of team expansions, reductions, and relocations currently consists of 30 teams.
69 The United States is home to 29 teams and one is located in Canada. The current league organization divides thirty teams into two conferences
70 of three divisions with five teams each. The current divisional alignment was introduced in the 2004-05 season. Reflecting the population
71 distribution of the United States and Canada as a whole, most teams are in the eastern half of the country: thirteen teams are in the
72 Eastern Time Zone, nine in the Central, three in the Mountain, and five in the Pacific.

```

50 and the Dallas Mavericks, both from the Southwest Division, faced one another in the Western Conference Semifinals while the 3rd seed,
51 the Northwest Division-leading Denver Nuggets, had fewer wins than the 4th, 5th, 6th, and 7th seeds. The NBA proposed and approved of the current
52 format to ensure that the best two teams of a conference can meet no earlier than the Conference Finals.
53 The Eastern Conference playoffs are divided into two preliminary rounds followed by the Eastern Conference Finals, with the winner of
54 the Conference Championship facing the Western Conference champion in the NBA Finals to determine the champion. All playoff series are
55 best-of-seven. The current divisional alignment was adopted at the start of the 2004–05 season, when the now Charlotte Hornets began play as
56 the NBA's 30th franchise. This necessitated the move of the New Orleans Pelicans from the Eastern Conference's Central Division to the newly
57 created Southwest Division of the Western Conference.</p>

JavaScript Codes:

The screenshot shows a Notepad++ window with the file "script.js" open. The code is a combination of JavaScript and CSS. It includes functions for changing images, validating form inputs (Name, Address, Email, Gender), and handling a slider. The code uses document.getElementById("myPhoto") to reference an image element and document.forms["signup"] to reference a form.

```
1 //fetching image from html by its ID:
2 var myImage=document.getElementById("myPhoto");
3 //importing images for slider:
4 var imageArray=["../Images/s2.jpg","../Images/s3.jpg","../Images/1.jpg","../Images/b4.jpg","../Images/4.jpg","../Images/2.jpg","../Images/s4.png",
5 "../Images/s6.jpg","../Images/introl.jpg"];
6
7 var imageIndex=0;
8 //function which changes images:
9 function changeImage () {
10     myPhoto.setAttribute("src", imageArray [ imageIndex]);
11     imageIndex++;
12     if (imageIndex>=imageArray.length) {
13         imageIndex=0;
14     }
15 }
16 //Setting Image change time:
17 var intervalHandle = setInterval(changeImage,2000);
18
19 myPhoto.onclick=function() {
20     clearInterval(intervalHandle);
21 }
22 //Validating form:
23 function validateForm(){
24     var x = document.forms["signup"] ["Name"].value;
25     if(x==""){
26         alert("First name must be entered!!!!");
27         return false;
28     }
29     var x = document.forms["signup"] ["Address"].value;
30     if(x==""){
31         alert("Address must be entered!!!!");
32         return false;
33     }
34     var x = document.forms["signup"] ["Email"].value;
35     if(x==""){
36         alert("Please provide your email for us to reply!!!!");
37         return false;
38     }
39     var x = document.forms["signup"] ["Gender"].value;
40     if(x==""){
41         alert("Gender must be selected!!!!");
42         return false;
43     }
44 }
45 }
```
